SMART Board™ 885ix

interactive whiteboard system

Feature availability

The SMART Board 800 series interactive whiteboard supports multiuser writing and common multitouch gestures currently recognized in Microsoft® Windows® 7 and Mac Snow Leopard. SMART Notebook software will support certain features, such as freestyle interaction, touch gestures, and full object awareness upon the release of updated software (SMART Notebook 10.7), expected by March 2011.

Experience true collaborative learning with the SMART Board 885ix interactive whiteboard system. The 885ix offers users an extraordinarily natural learning experience that makes it easy to interact with lessons. It enables two users to instantly start working on lessons at the same time, allowing each user to work in a way that is intuitive to them*.

In a class of its own

As part of the 800 series, the 885ix represents a new class of interactive whiteboard. This interactive whiteboard system features a powerful SMART Board interactive whiteboard, the SMART UX60 ultra-short-throw projector, an extended control panel and a modular Pen Tray. This combination delivers a precise and intuitive touch experience along with stunning image quality and an interactive widescreen surface for teaching and learning. And because it's an integrated system, it's easy to control and manage your classroom technology.

Truly collaborative learning

With the 885ix, two users can work on a lesson at the same time, anywhere on the interactive whiteboard*. Each user can use a finger or a pen to simultaneously write, draw and manipulate content in SMART Notebook™ collaborative learning software. The system doesn't require a separate multiuser mode, so teachers can enable collaboration instantly. A user can also write with a pen, erase with a palm and move objects with a finger.

More magical moments

Lessons are interactive and energetic with the 885ix. You can use simple, intuitive touch gestures* to toss, rotate or zoom in on objects in SMART Notebook software, or access other applications in Windows 7 or Mac Snow Leopard.

The magical touch experience of the 885ix means that you can interact with your lessons and multimedia quickly and easily – without having to access on-screen menus.

1 SMART Board interactive whiteboard – a multiuser interactive whiteboard that enables two users to simultaneously write, erase and manipulate content

2 SMART UX60 projector – an integrated, ultra-short-throw WXGA (1280 x 800) projector with a 16:10 aspect ratio. The SMART UX60 has a 12" (30.5 cm) optical throw distance to the interactive whiteboard

3 Extended control panel – a panel that provides centralized control over classroom technology

4 Modular Pen Tray – the advanced Pen Tray automatically detects tool modes. The Pen Tray also has two wings on the side that allow you to add accessories.

Key features
Multitouch experience
Two users can simultaneously write, perform mouse functions, erase, and manipulate and move objects on the interactive whiteboard surface – and no special tools are required.

Freestyle interaction*
The system enables two users to instantly start working together without having to switch into a separate multiuser mode or work in a confined area. And each user can individually complete actions, like writing in digital ink or moving objects with their fingers.

Object awareness
The 885ix uses cameras to identify when a user switches between using a finger, pen and eraser. A user can also write with a pen, erase with a palm and move objects with a finger, without having to press buttons, access on-screen menus or replace tools in the Pen Tray.

Touch gestures*
Use simple, intuitive hand and finger gestures to toss, rotate or zoom in on objects and interact within SMART Notebook software. The 885ix has built-in support for multitouch operating systems like Microsoft Windows 7 and Mac Snow Leopard.

SMART Ink
Discover a natural, responsive and accurate writing experience with SMART Ink. It smoothes out the appearance of the digital ink, which improves the legibility of your handwriting as you write over applications, websites and videos. The ink becomes an object that you can move and manipulate.

Superior image quality
The SMART UX60 projector uses BrilliantColor technology from Texas Instruments to produce high levels of brightness and contrast. Video, data and lesson files will look crisp and bright from every position in the room.

Network-enabled projector
Connect the SMART UX60 projector to your school's IP network to send and receive commands to and from the web server or SNMP client. As a networked interactive whiteboard system, the 885ix has asset management features that enable you to control and manage the projector remotely.

Long-lasting lamp
The SMART UX60 lasts for 3,000 hours in standard mode and 4,000 hours in economy mode.

Warranty
Get a 3-year warranty on the SMART UX60 projector. The SMART Board interactive whiteboard has a 5-year warranty upon product registration.

* Feature will be supported in SMART Notebook software upon release of updated software (SMART Notebook 10.7), expected by March 2011.
